

Using Water at home – A Survey

- Print out this sheet and complete the survey over three days at home.
- After the three days, add up the amount of water you and your household used for the different activities in the column on the right. Finally add up all these totals to make a grand total of the water used over 3 days in the bottom row.
- Compare your results with your classmates – which household was the biggest water user?

Activity	Average amount of water used each time in litres	Number of times each activity takes place in your household			Total amount of water in litres
		Day 1	Day 2	Day 3	
Having a bath	80				
Having a shower	30				
Flushing the toilet	10				
Washing hands	1				
Brushing teeth	1				
Full load in a washing machine	125				
Washing up by hand	5				
Using a dishwasher	65				
Making a pot of tea	2				
Making a cup of coffee	0.5				
Washing a car	25				
Watering the garden with a hose	100				
GRAND TOTAL AMOUNT OF WATER USED OVER 3 DAYS
